

Chassis Manufacturing

We design and manufacture custom and NEMA-rated enclosures, chassis and complex weldments. For the medical industry, we design and manufacture custom medical carts and medical equipment chassis. HUI is now ready to do custom chassis fabrication and create chassis enclosures, server chassis, medical server chassis, computer chassis and many other customization options to fit our customer's needs.

Chassis Assembly

In addition to the chassis sheet metal base, we have the expertise and capabilities to put together a full project. Our paint and assembly line can take the bare bones chassis and do the fully assembly, gasket fitting, pad printing, power coat painting and silk screen.
